

TEIGNMOUTH URBAN DISTRICT COUNCIL.ANNUAL REPORT OF MEDICAL OFFICER OF HEALTH, 1946.

Public Health Officers of the Urban District:

F. Stanley L. Piggott, M.R.C.S., L.R.C.P.
Medical Officer of Health.

Norman S. Tucker, C.R.S.I., M.S.I.A.
Sanitary Inspector.

F.H. Clinch, B.Sc., A.C.G.I., Assoc. M. Inst. C.E.
Surveyor & Water Engineer.

TEIGNMOUTH URBAN DISTRICT.

Area (in acres)	2350
Population (estimated)	9700
Number of inhabited houses (end 1946) according to	
Ratebooks - 3077, including houses with shops and flats.	
Rateable value	£91,906.
Sum represented by a penny rate -	£364.1.3.64d.

Social Conditions.

There are no major industries in the District except a Shipbuilding Yard and the export of China Clay, which is mined in adjoining districts and transported to the Harbour for loading into sea-going vessels. Otherwise the District is entirely residential and caters for visitors all the year round.

Vital Statistics.

		M.	F.	Total.
Live births	Legitimate	73	78	151
	Illegitimate	12	7	19
Still births	Legitimate	3	1	4
	Illegitimate	Nil	Nil	Nil

Birth rate (per 1000 population) 16.9

Still birth rate (per 1000 live and still births) 24.4.

Deaths (all causes) 171 (M - 77, F - 94) Crude death rate 17.63
per 1000.

Corrected 176 Corrected death rate
18.14 per 1000.

Deaths from Puerperal causes	-	Nil
Cancer	-	32
Whooping Cough	-	Nil
Measles	-	Nil
Infantile Diarrhoea	-	Nil

Deaths of infants under 1 year of age -

Legitimate - Males 2 Female 1 Total 3 (19.86 per 1000)

Illegitimate - Males 4 Female 1 Total 5 (263 per 1000)

Totals 6 2 8 illegitimate births.

Tuberculosis. Particulars of new cases notified during 1946 in the District are as follows:-

Age Periods.	Pulmonary		Non-Pulmonary	
	Male	Female	Male	Female
Under 25	2	Nil	Nil	Nil
25 - 34	1	2	Nil	Nil
35 - 44	Nil	Nil	Nil	2
45 - 54	Nil	Nil	Nil	Nil
55 - 64	1	Nil	Nil	Nil

Deaths from Tuberculosis numbered three only.

Pulmonary 2 Males aged 25 and 60 years.
Non-Pulmonary 1 Female aged 37.

1950-1951

TEIGNMOUTH URBAN DISTRICT COUNCIL.Incidence of and control over Infectious Diseases during 1946.

<u>Diseases.</u>	<u>Total cases notified.</u>	<u>Admitted to Hospital.</u>	<u>Deaths.</u>
Smallpox	Nil	Nil	Nil
Scarlet Fever	5	3	Nil
Diphtheria	Nil	Nil	Nil
Typhoid Fever	Nil	Nil	Nil
Puerperal Fever	Nil	Nil	Nil
Puerperal Pyrexia	Nil	Nil	Nil
Pneumonia	9	Nil	6
Whooping Cough	16	1	Nil
Erysipilas	2	Nil	Nil
Acute Poliomyelitis	2	2	Nil
Measles	296	Nil	Nil

No case of Diphtheria was notified during the year;
One hundred and eighty three (183) children were immunised during the year against Diphtheria.

SANITARY INSPECTOR'S REPORT, 1946.

I am informed by the Sanitary Inspector that during the year he has made a total of 2757 Inspections and Visits in connection with his official duties.

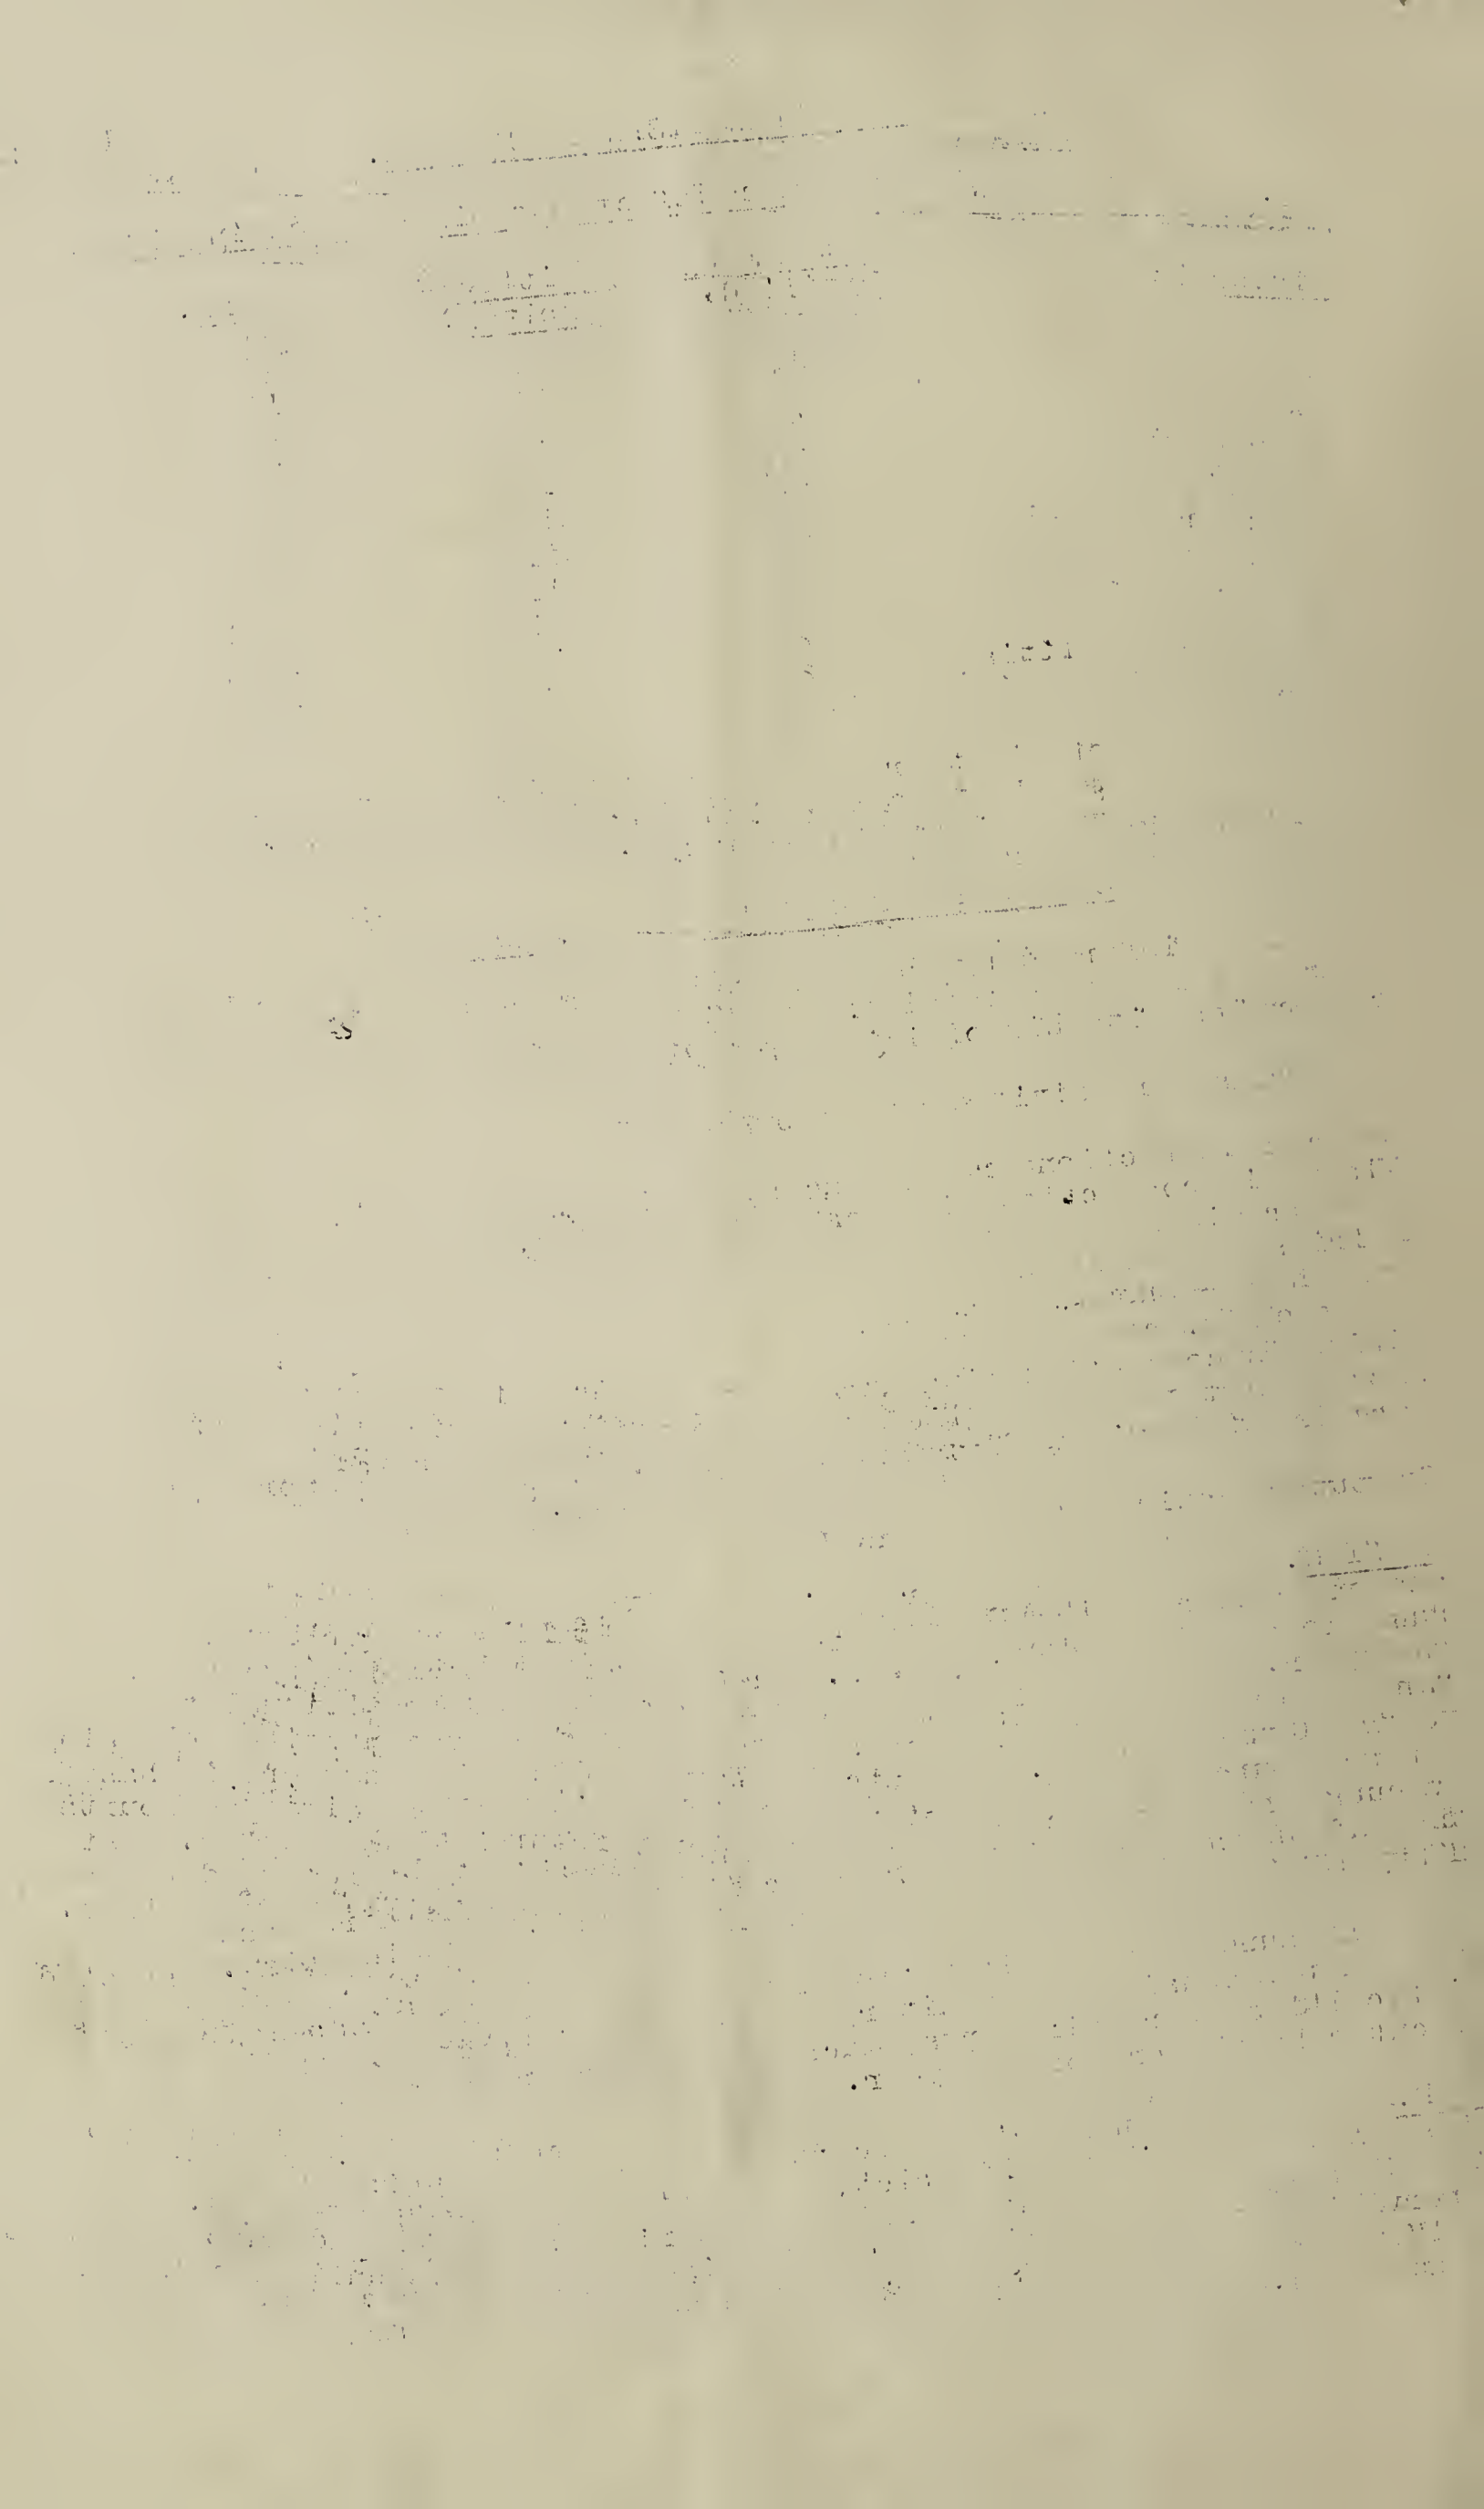

These are divided as follows:-

General Inspections re Nuisances, Housing, etc.	1069
Visits in connection with works in progress, etc.	1021
Food Premises	218
Dairies and Cowsheds	95
Workshops - Shops, etc.	85
Rooms disinfected	80
Visits in connection with Rate & Mice Infestation	189
Smoke & Water Tests applied to drainage during visits	626
Parcels of Bedding, Clothing, etc. passed through Steam Disinfector	20
Statutory Notices served	7

HOUSING. During the year a site was purchased at Kingsway and one hundred (100) temporary aluminium prefabricated bungalows were erected. These were all occupied by the end of the year. Also the construction of eight traditional type three bedroomed houses was commenced on a vacant site belonging to the Council at Hutchings Way and negotiations were in hand for the purchase of an extensive site between Third and Fourth Avenues and Coombe Park Road for future Council Housing. At the end of the year there were approximately three hundred and fifty (350) names of applicants on the Council's Housing List.

One hundred and thirty two (132) old houses were inspected for general housing and sanitary defects and in spite of the difficulties of repair works, much of the work required was executed by the end of the year.

FOOD. No slaughtering (except occasional slaughter of pigs) took place in the District, all meat being obtained from the Ministry of Food Centralised Slaughtering Depots, but supervision of food premises was maintained and a total weight of 1717 lbs of foodstuffs was condemned as unfit for human consumption.

TEIGNMOUTH URBAN DISTRICT COUNCIL.REFUSE COLLECTION AND DISPOSAL.

This work was passed to the Public Health Department in 1944 and collections were carried out by a Dennis Moving Floor Vehicle and a Guy Refuse Lorry. Both became worn out and were replaced in 1944 and 1945 by Karrier "Bantam" Refuse Vehicles, which continue to give good service.

Tipping is carried out, by controlled methods, at the Council's Tip at Broadmeadow, which it is proposed eventually to convert to a large level area, capable of accommodating football grounds, cricket pitches, etc. which are badly needed in the District.

SALVAGE.

Continuous effort has been made to increase the collection of Salvage, particularly paper, and it is gratifying to report that quantities increase yearly. In 1945 the total weight of all Salvage sold was $82\frac{1}{2}$ tons, the value being approximately £550 and in 1946 this was increased to $96\frac{3}{4}$ tons, worth approximately £616.

Collection is by means of two trailers attached to the Refuse Lorries, so that all premises are visited weekly and in addition a special collection is made from shops, hotels, etc. Baling and storage is carried out at the Salvage Depot at the Broadmeadow Refuse Tip.

GENERAL.

A Summary of Sanitary Work executed during the year is appended hereto:-

House Drainage relaid	27
House Drainage repaired	54
Choked Drainage cleared	85
Sinks provided	45
Flushing apparatus repaired	
or provided	38
Yards paved	27
Rooms & Premises cleaned	58
Ashbins provided	17
Dampness abated	58
Roofs repaired or new provided	49
Additional Ventilation provided	3
Offensive accumulations removed	43
Miscellaneous nuisances abated	97
Water supplies improved	23
Rooms disinfected	80
Illegal occupation of premises prohibited	23
Houses condemned as unfit	2
Rat and Mice infestations abated	28
Vermineous premises dealt with	18

100

1. The first part of the report

2. The second part of the report

The first part of the report is devoted to a general description of the project. It includes a statement of the purpose of the study, a brief review of the literature, and a description of the methods used. The second part of the report is devoted to a detailed description of the results of the study. It includes a discussion of the findings, a comparison of the results with those of other studies, and a conclusion.

The third part of the report is devoted to a discussion of the implications of the findings. It includes a discussion of the limitations of the study, a discussion of the strengths of the study, and a discussion of the future directions of the research.

The fourth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The fifth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The sixth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The seventh part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The eighth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The ninth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

The tenth part of the report is devoted to a discussion of the conclusions of the study. It includes a summary of the findings, a discussion of the implications of the findings, and a discussion of the future directions of the research.

TEIGNMOUTH URBAN DISTRICT COUNCIL.

By the kindness of the Water Engineer I am able to quote the following figures in regard to the Water Supply of the District.

PARTICULARS OF WATER SUPPLY - YEAR ENDING 31st DECEMBER, 1946.TEIGNMOUTH.LOW LEVEL.

Total Consumption	70, 412,000 gallons.
Average Daily Consumption	192,910 "
Estimated Population supplied	4,874
Hours of Supply - 1946	Continuous (except for 3 days in December)
do do - 1945	Continuous
Rainfall - 1946	42.79 inches.
do - 1945	31.14 "

TEIGNMOUTH.HIGH LEVEL.

Total Consumption	88,897,000 gallons.
Average Daily Consumption	243,553 "
Estimated Population supplied	3,486
Hours of Supply - 1946	Continuous (except for 3 days in December)
do do - 1945	Continuous
Rainfall - 1946	42.25 inches.
do - 1945	31.67 "

SHALDON.

Total Consumption	25,947,200 gallons.
Average Daily Consumption	71,088 "
Estimated Population supplied	1,350
Hours of Supply - 1946	Continuous (except for 3 days in December)
do do - 1945	Continuous
Rainfall - 1946	45.79 inches.
do - 1945	31.92 "
